

Online Learning:

While it may seem difficult and overwhelming, online classes aren't as bad as you may think...take my advice to succeed!

Read the Syllabus:

- ◆ As much as you may not want to, the syllabus has all the necessary information you need to do your best in an online class. Make sure to take some time out of your day to read the syllabus and get familiar with it!

Reach out to your Professors:

- ◆ If you are having any trouble at all, email your professor! That is what they are there for! Whatever question you may have, they are always there to help answer them and a majority of the time, answer really quick!

Make sure you give yourself enough time to finish an assignment:

- ◆ Do not do it the night before! Professors can tell when an assignment has been rushed and has little effort put into it and will likely take off points. Take the time to do the assignment well in advanced and you won't have a problem! It will also leave you enough time to edit it if need be!
